

## Software Engineer

Aptys Solutions is seeking an individual in the Atlanta, GA area with entrepreneurial initiative and technical passion, willing to lead and be responsible for:

- Design, development and support of new products and features
- Operational oversight of technology infrastructure
- Support and maintenance of existing products
- Provide leadership to product interface/integration with Aptys clients
- Provide leadership to all aspects of product development

The following attributes and characteristics are required:

- Demonstrated experience leading others in a lead developer/architect role
- Senior (or near senior level) C# developer
- Strong experience developing [ASP.NET](#) applications/sites
- Good general application development experience
- Enterprise application development experience is a plus but not required
- Payments (Check, ACH, credit card, etc...) related experience a bonus
- Well-rounded infrastructure capabilities
  - Must have experience scaling infrastructure as demand grows. Should have developed expertise in recommending and leading efforts to quickly adapt infrastructure and software to increased demand.
- Good communication skills and emotional intelligence. We are an early-stage company, you must be able to roll with the punches and play well with others.
- Willing to go the extra mile and do what it takes to deliver.
- Ability and willingness to collaborate with internal and external resources during solution development.
- Strong interest in emerging technologies.

Aptys Solutions offers a competitive compensation and benefits package and a flexible work environment. Interested candidates please send your resume to [recruiter@ptyssolutions.com](mailto:recruiter@ptyssolutions.com).
