

elevate your game

with our **REAL-TIME**
payments solution

The fintech partner for financial institutions

Make the jump and establish your FI as a leader in **real-time payments**

As a fintech leader in the financial services industry, Aptys Solutions, is paving the way in faster payments with cloud-based services offering financial institutions faster innovation, micro-services architecture, flexible resources, and economies of scale.

Through our easy and efficient gateway service, Instant Pay, financial institutions can process transactions instantly and connect to both the FedNow™ Service and RTP™ through a single system. Instant Pay is a digital, API-driven communications, real-time payments solution. Aptys' independent gateway service is a key tool for financial institutions who want to grow and scale their ability to deliver end-to-end, send, receive, and settlement capabilities while offering payment solutions to meet the market need, bringing simplicity to the complex world of faster payments.

- Flexible platform for managing all payments including ACH, wires, check, and real-time payments
- ONE system to manage both RTP and the FedNow™ Service
- An alternative to your Core provider
- Easy to use tools
- API Integration
- Extensible technology
- Shared gateway connection to the FedNow™ Service and The Clearing House
